

JOURNEY DUO

TWO PERSON TENT

Assembly Instructions

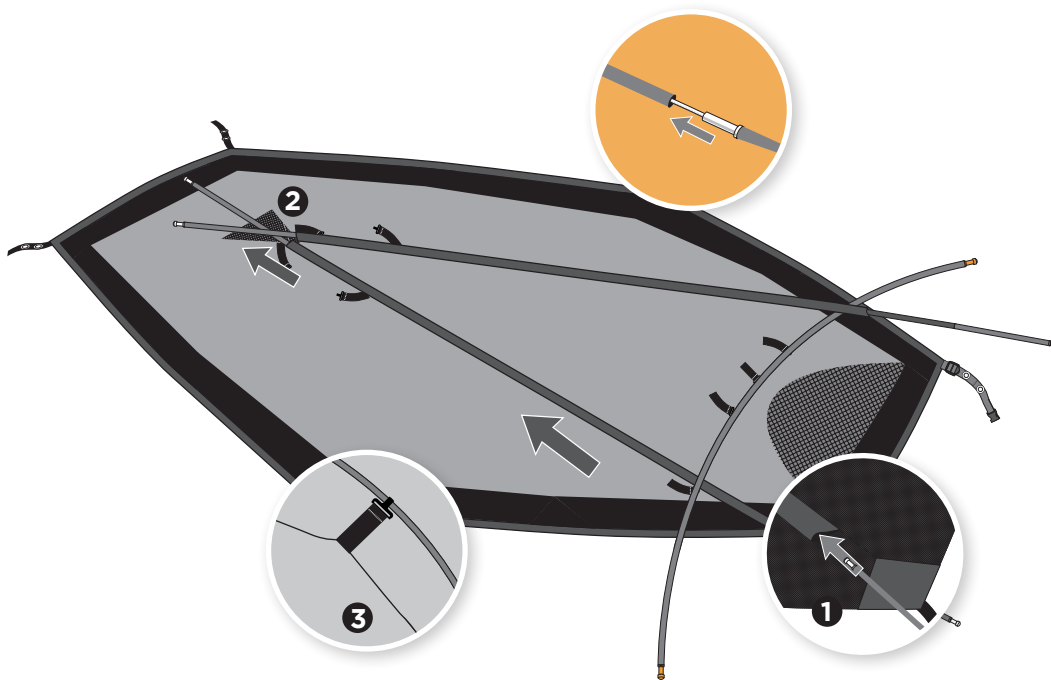

1 Angled Orange Tipped Pole

2 Straight Silver Tipped Poles

18 Alloy Stakes

Lay out the footprint before erecting the tent. Unroll the inner tent, locate the pole bag, separate the poles, clip the sections together making continuous poles. The poles are held together by elastic.

Pole Placement

1. Insert the silver tipped straight pole with silver section to black trim edging.
2. Insert the other silver tipped straight pole with silver section to silver trim edging.
3. Clip the inner tent to the orange tipped pole with the black plastic clips.

4. Insert the pole ends into the grommets in the corresponding webbing straps.
5. Clip the inner tent to the silver tipped pole with the black plastic clips.
6. When all the pole ends are inserted into the grommets take the ultralight alloy stakes included with the Journey Duo, stake down the corners with the webbing straps. Add additional stakes to other stake points as required.
7. At this stage the Journey Duo can be used as a stand-alone insect shelter.

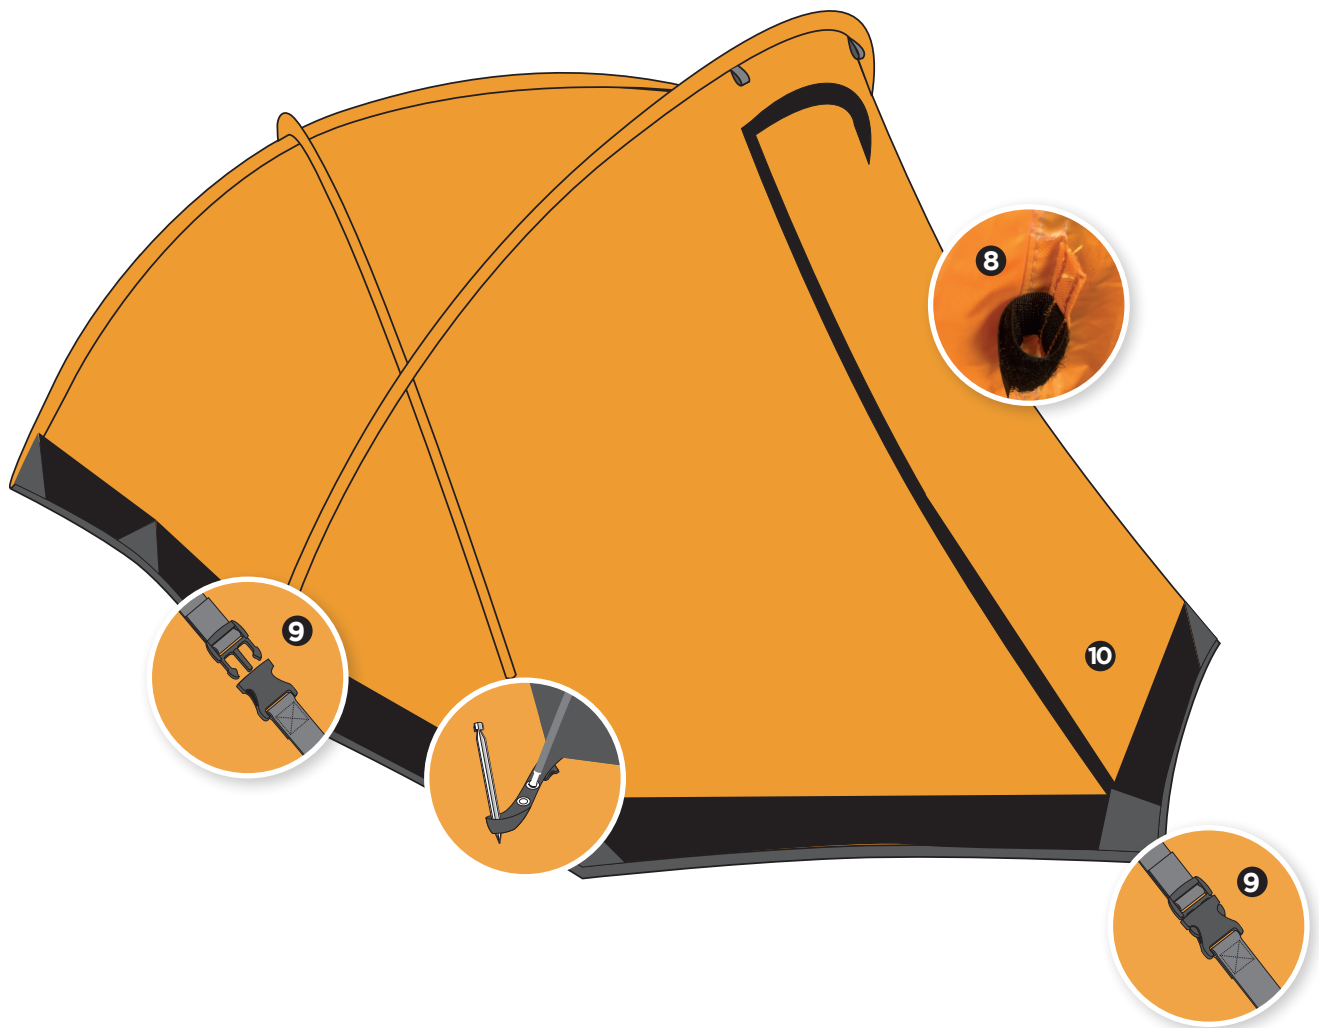

JOURNEY DUO

TWO PERSON TENT

Assembly Instructions

8. Take out the fly (Outer Tent) unfold and lay out. Drape the fly over the main body matching up the door and foot area and connect the two with the velcro loops.
9. When the inner tent is connected with the fly click all the side release buckles together.
10. To gain access unzip the fly and inner tent zips.
11. When happy with the set-up, further stabilisation is achieved by pegging out the guy lines. This is essential in windy conditions.

WARNING:

KEEP ALL FLAME AND HEAT SOURCES AWAY FROM THIS TENT FABRIC. THIS TENT MEETS THE FLAMMABILITY REQUIREMENTS OF CPAI-84. THE FABRIC MAY BURN IF LEFT IN CONTINUOUS CONTACT WITH ANY FLAME SOURCE. THE APPLICATION OF ANY FOREIGN SUBSTANCE TO THE TENT FABRIC MAY RENDER THE FLAME-RESISTANT PROPERTIES INEFFECTIVE.

THIS TENT MEETS THE FLAMMABILITY REQUIREMENTS OF ISO6941 / (EN5912).
